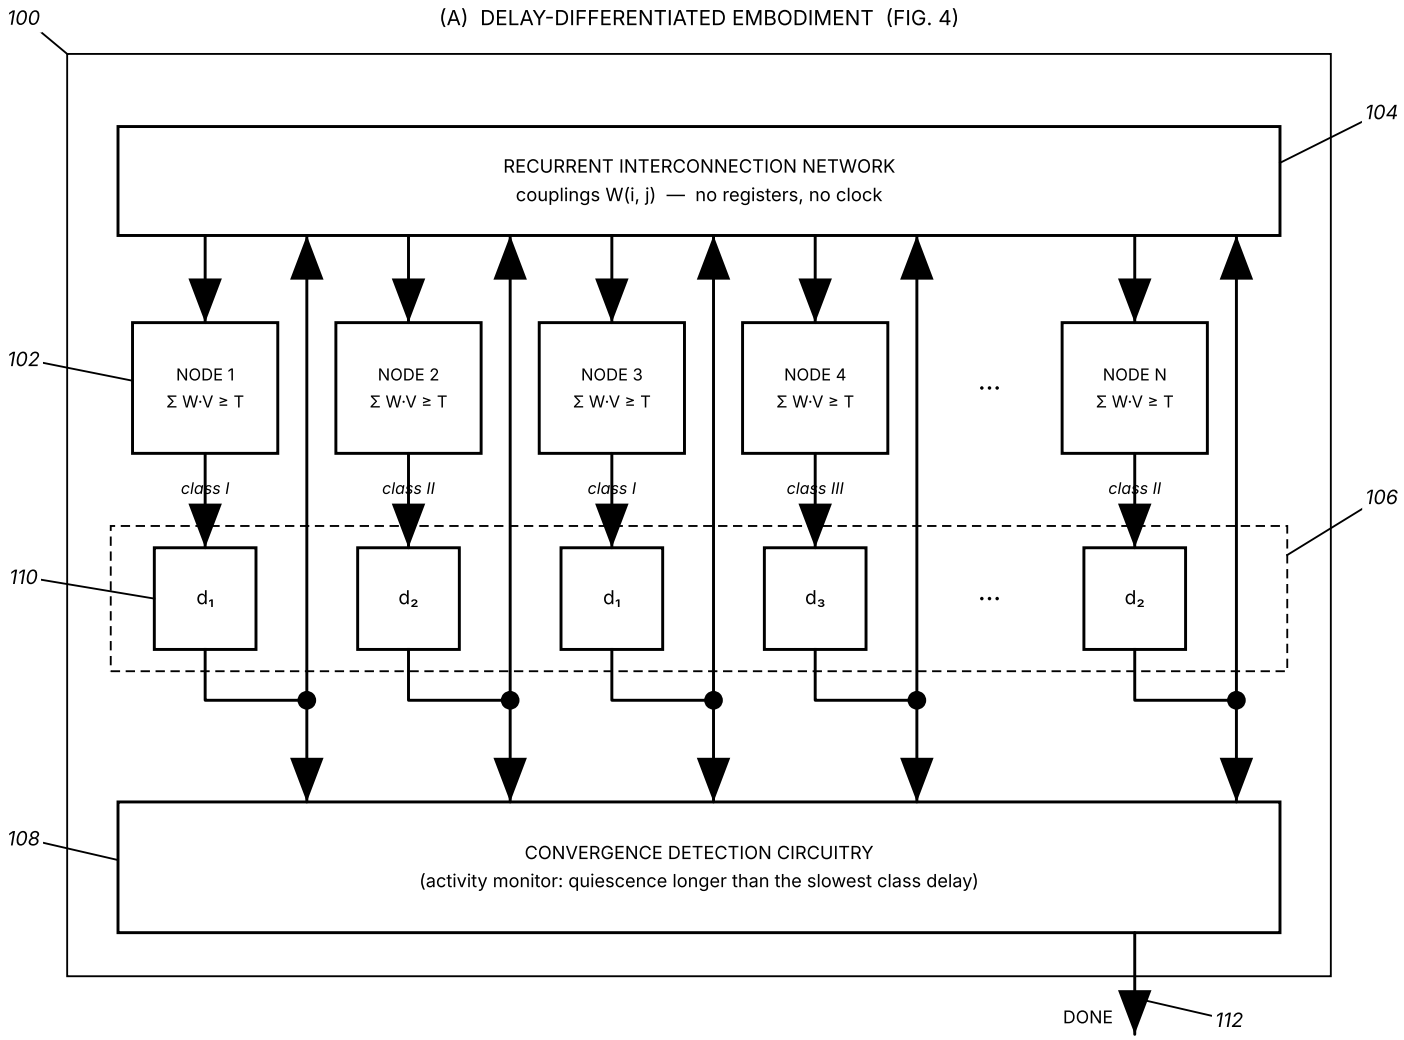
SELF-TIMED RECURRENT THRESHOLD-LOGIC NETWORK CIRCUIT



106 SEQUENCING CIRCUITRY (CLOCKLESS) IS DISTRIBUTED: one inertial delay element 110 per node circuit, inside that node's own feedback path. There is no central sequencer, clock or state machine. Classes I, II, III are a proper colouring of the coupling graph (FIG. 2); d_1, d_2, d_3 are pairwise different.

(B) HANDSHAKE EMBODIMENT (FIG. 5) — HERE 106 IS A SHARED BLOCK
